```

```
    about    :
```

"Android Developer with over 8 years of experience in building high-quality mobile applications. Skilled in modern architectures like Clean Architecture and modular project design, with strong proficiency in Kotlin, XML, Hilt, Room, Kotlin Flow, and Jetpack Compose. Adept at designing intuitive and user-friendly interfaces, and collaborating effectively with UI/UX teams to turn design concepts into clean, practical implementations.

Highly experienced in working closely with backend teams, especially with Java Spring Boot services, to design, optimize, and consume RESTful APIs that improve app performance and scalability. Also skilled in leading technical teams and mentoring junior developers, maintaining a strong focus on clean code, scalable architecture, and continuous improvement."

experience: [

{

{

title : " Senior Android Developer " ,

company : " Hovita " ,

employmentType : " full-time " ,

date : " Feb 2024 until now " ,

duration : " 1 Year and 9 month " ,

description : " Developing and maintaining Android applications using Clean Architecture and modular design, focusing on scalable and maintainable codebases leveraging modern technologies.

Implemented Multi-Module architecture to separate features and improve build time and testability.

Applied Clean Architecture principles with MVVM, Hilt, and Repository Pattern.

Built UI screens using Jetpack Compose, following best practices for separation of concerns and reusability.

Utilized Kotlin Flow for reactive data handling in ViewModels.

Integrated and managed an internal SDK (msau) across multiple modules in the project.

Worked with Room, Retrofit, Navigation Component, and other Android Jetpack libraries.

Collaborated closely with backend teams using Java Spring Boot, contributing to the design, testing, and optimization of RESTful APIs for better performance and reliability.

Collaborated with the team to improve project structure, apply SOLID principles, and ensure testability. "

}

title : " Senior Android Developer " ,

company : " Deno Electronic " ,

employmentType : " full-time " ,

date : " Oct 2023 - Feb 2024 " ,

duration : " 4 month " ,

description : " Upon joining Deno Electronics Company, I ventured into the world of IoT. As a senior Android programmer, my responsibility was to develop an application capable of communicating with hardware devices such as Arduino (including ESP-32) and transmitting the necessary commands to these devices.

During this period, my programming experience in the Android domain underwent

significant enhancement. My proficiency in the Kotlin language soared, and I mastered the

program structure and architecture using tools like Hilt, Room, Repository, Retrofit,

ViewModel, and more, ensuring optimal implementation.

Moreover, I seized the opportunity to learn server-side API programming, acquiring a

relatively good understanding of API development using FastApi. "

}, {

title : " Front-End(vue.js) Developer " ,

company : " AlaaTV " ,

employmentType : " full-time " ,

date : " Feb 2021 - oct 2023 " ,

duration : " 2 years and 11 month " ,

description : " in the middle of my military service and With a shift in the company's policy from native application design utilizing Java and Kotlin to hybrid application design employing the Quasar framework and Vue.js programming language, I am eager to seize the opportunity to acquire these new skills. I aspire to enhance my proficiency in programming, aiming to strengthen my abilities in full-stack "

}, {

title : " Mid-level Android Developer " ,
company : " AlaaTV " ,
employmentType : " full-time " ,
date : " jan 2019 - april 2021 " ,
duration : " 2 years and 3 month " ,
description : " With the continuation of the company's activities and the expansion of the technical team, I became responsible and teamleader of four Android developers. we collaborated within the Android technical team and successfully achieved a 4.8 rating out of an average 8K+ in the Google Play Store. This rating reflected the excellent user experience of this educational application, achieved through the collective efforts of the team. "

}, {

title : " Android Developer " ,
company : " AlaaTV " ,
employmentType : " part-time " ,
date : " jul 2018 - may 2019 " ,
duration : " 10 month " ,
description : " Continuing my involvement in the

Android field, I joined Alaa Educational Company, where the presence of a young and creative technical team provided me with an opportunity to create the Android application for this educational website from scratch, utilizing the latest technology introduced in the Android domain "

}, {

title : " junior Android Developer " ,

company : " Avaye fanavari rahgoshaye nikan " ,

employmentType : " part-time " ,

date : " mar 2017 - jun 2018 "

duration : " 1 years and 3 month " ,

description : " Since the organization's duty was to develop software, I worked with the company on several different projects and I learned many skills, including working with phone sensors. "

}, {

title : " Android Developer InternShip" ,

company : " tamco " ,

employmentType : "part-time " ,

date : " sep 2016 - feb 2017 "

duration : " 5 month " ,

description : " First, I started the Android internship in this company for 5 months, and according to the company's field of activity, which was developing an Android application for the elevator industry, I started doing projects and learning more about Android alongside the technical team. "
